TASK 1 — AWS CLOUD SETUP

Week 2 Cloud Computing Internship Assignment

Student: Manish Chaudhari **Service:** Amazon EC2 **OS:** Amazon Linux 2023 **Instance:** t3.micro

Objective

Gain hands-on experience with AWS EC2 by launching and configuring a virtual machine instance, configuring security groups, connecting through SSH, and deploying a basic web service on the cloud.

Completion Summary

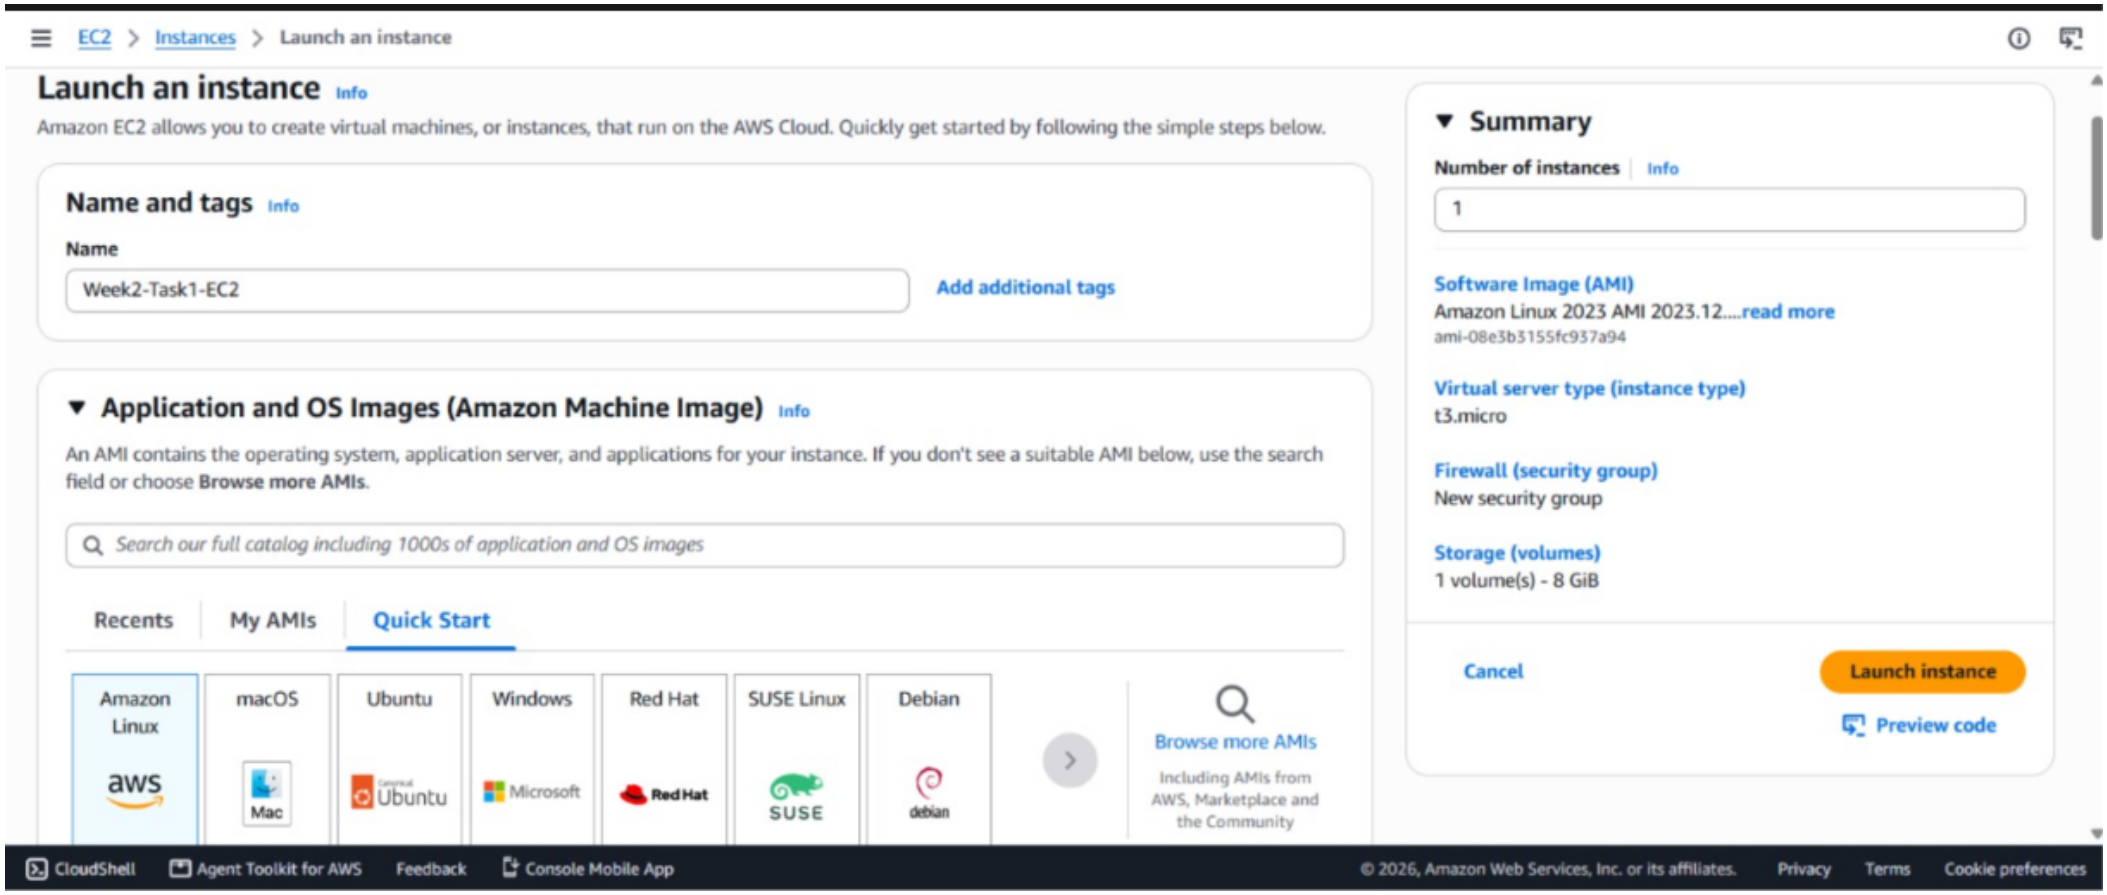

The EC2 instance was launched and configured with SSH and HTTP access. A key pair was created for secure SSH access. The instance was accessed remotely, Nginx was installed and started, the web server was verified through the public IP, and an AMI was created from the configured instance.

Configuration Summary

Item	Configuration
EC2 Name	Week2-Task1-EC2
AMI / OS	Amazon Linux 2023
Instance Type	t3.micro
Key Pair	week2-task1-key
Security Group	week2-task1-sg
SSH	TCP 22 — My IP
HTTP	TCP 80 — Anywhere (0.0.0.0/0)
Web Server	Nginx
AMI Created	week2-task1-ami

1. EC2 launch configuration

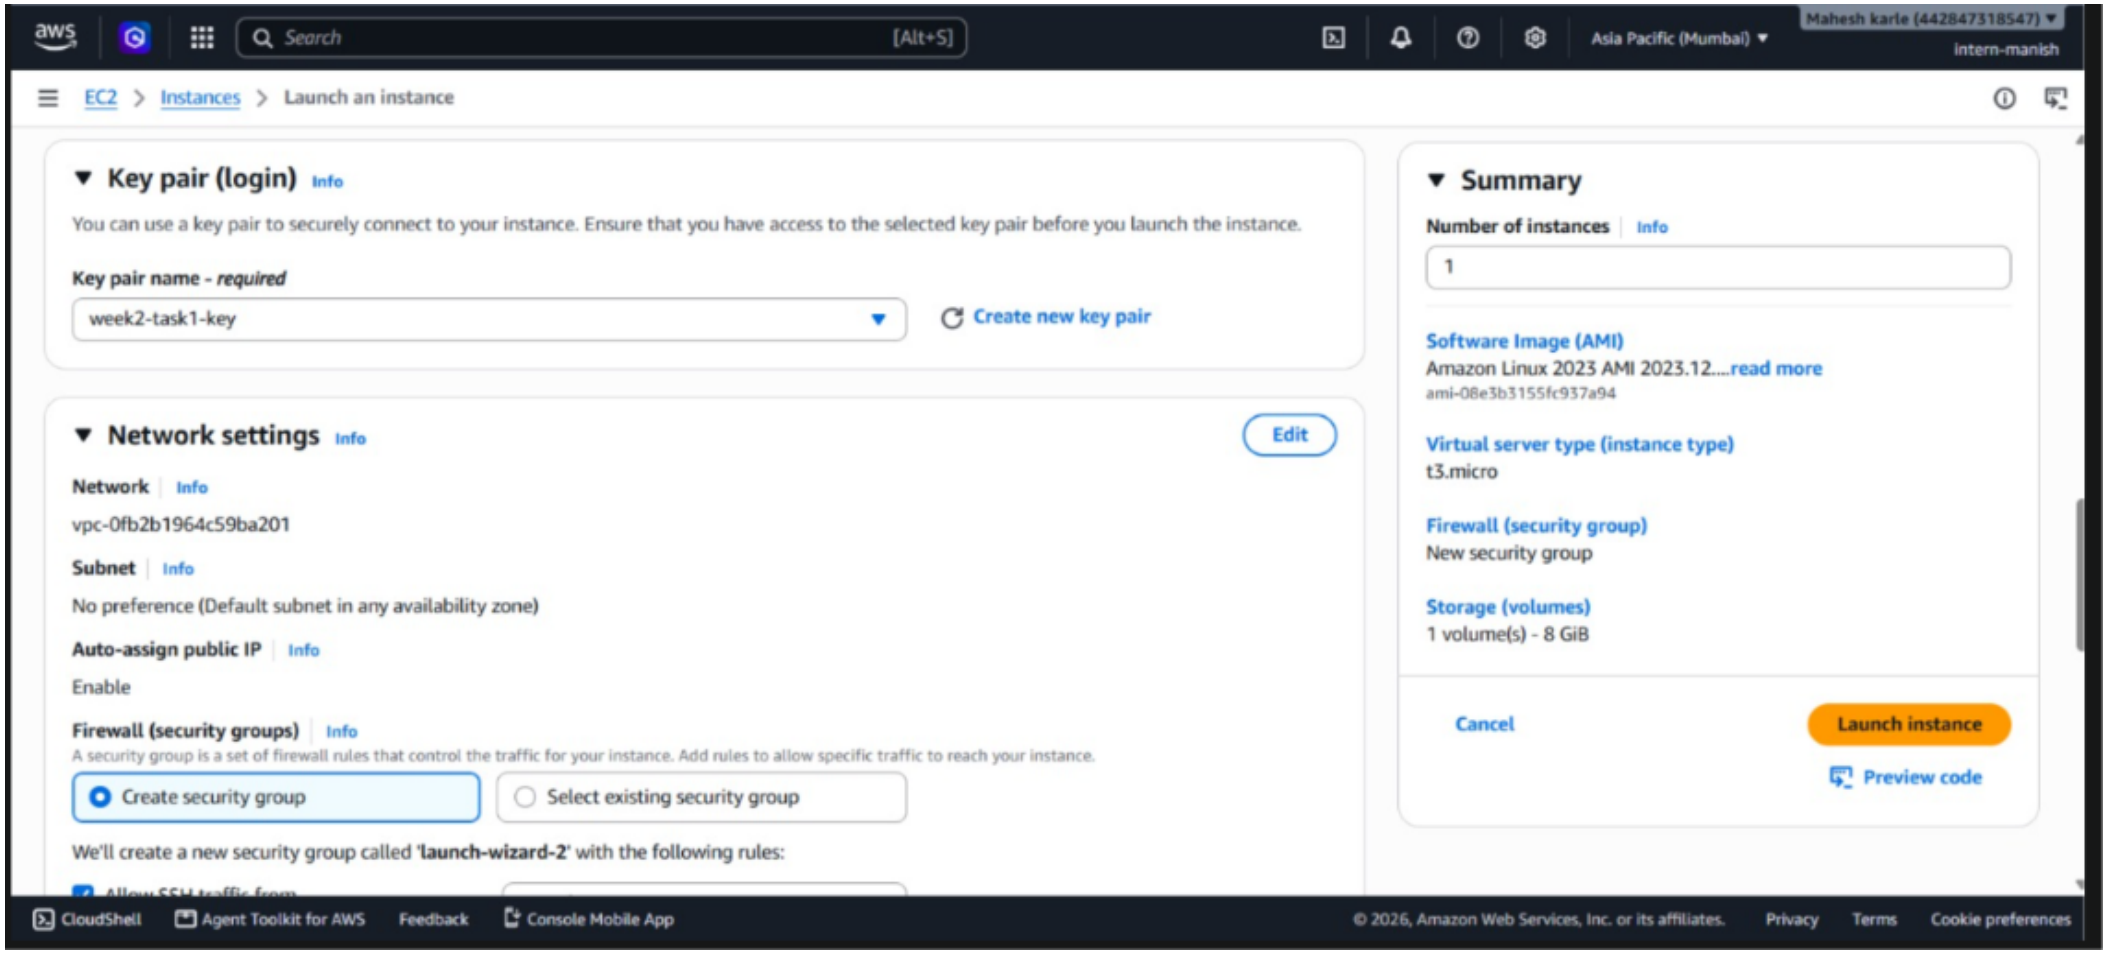

Shows the Week2-Task1-EC2 instance configuration, Amazon Linux 2023 image, and t3.micro instance type.

Evidence screenshot: 01_EC2_Launch_Configuration.png

2. Key pair configuration

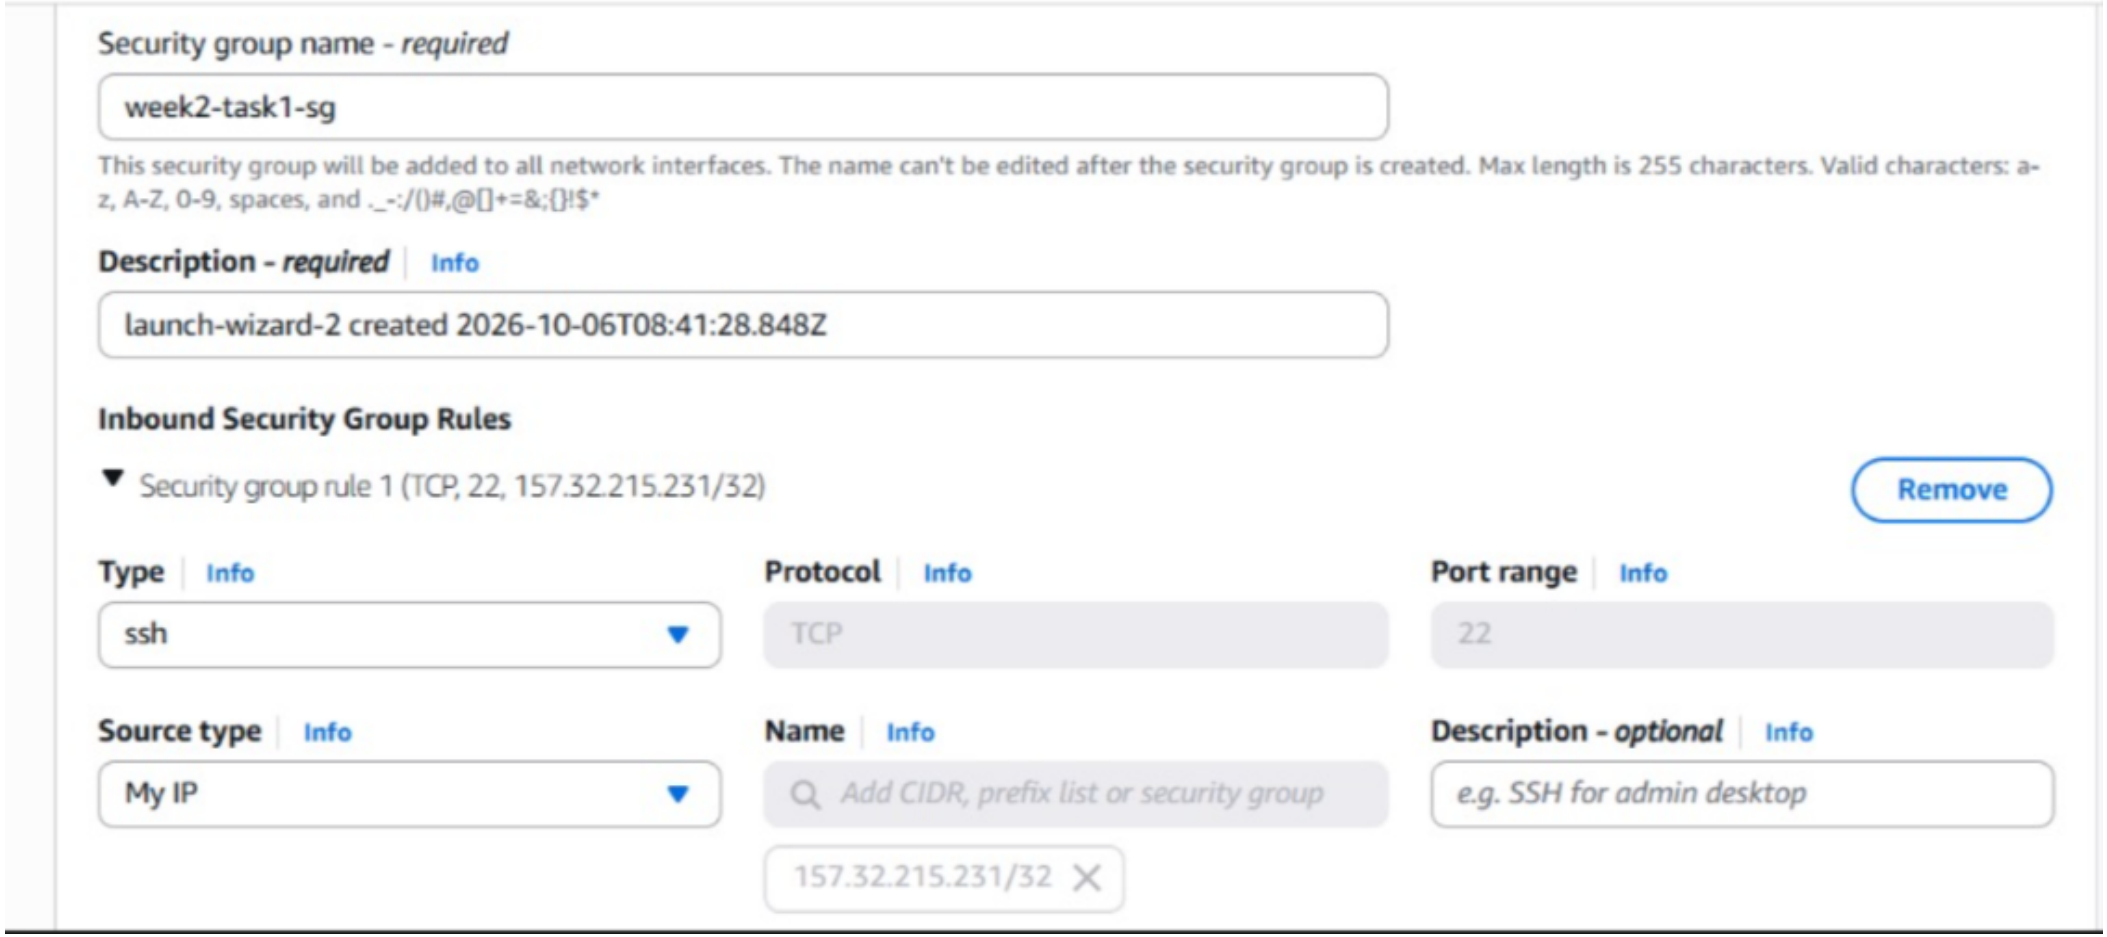

Shows the week2-task1-key key pair selected for SSH access.

Evidence screenshot: 02_Key_Pair_Configuration.png

3. Security Group — SSH rule

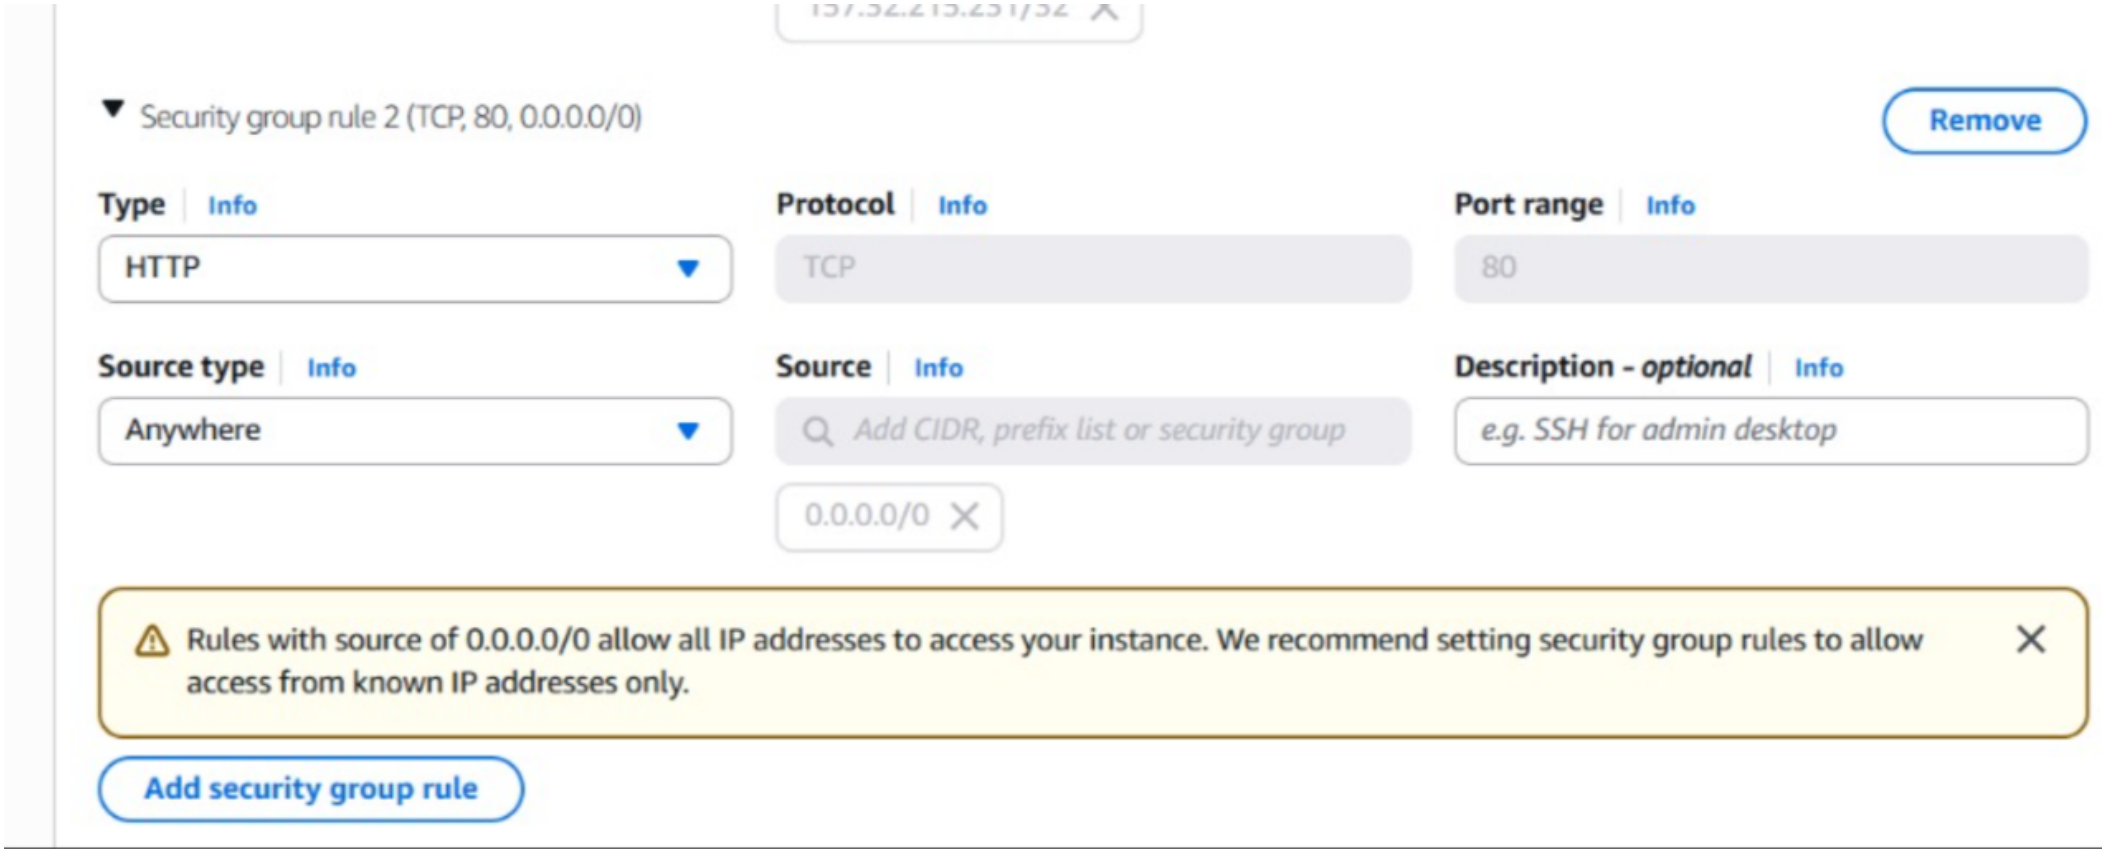

Shows SSH (TCP 22) configured with My IP as the source.

Evidence screenshot: 03_Security_Group_SSH.png

4. Security Group — HTTP rule

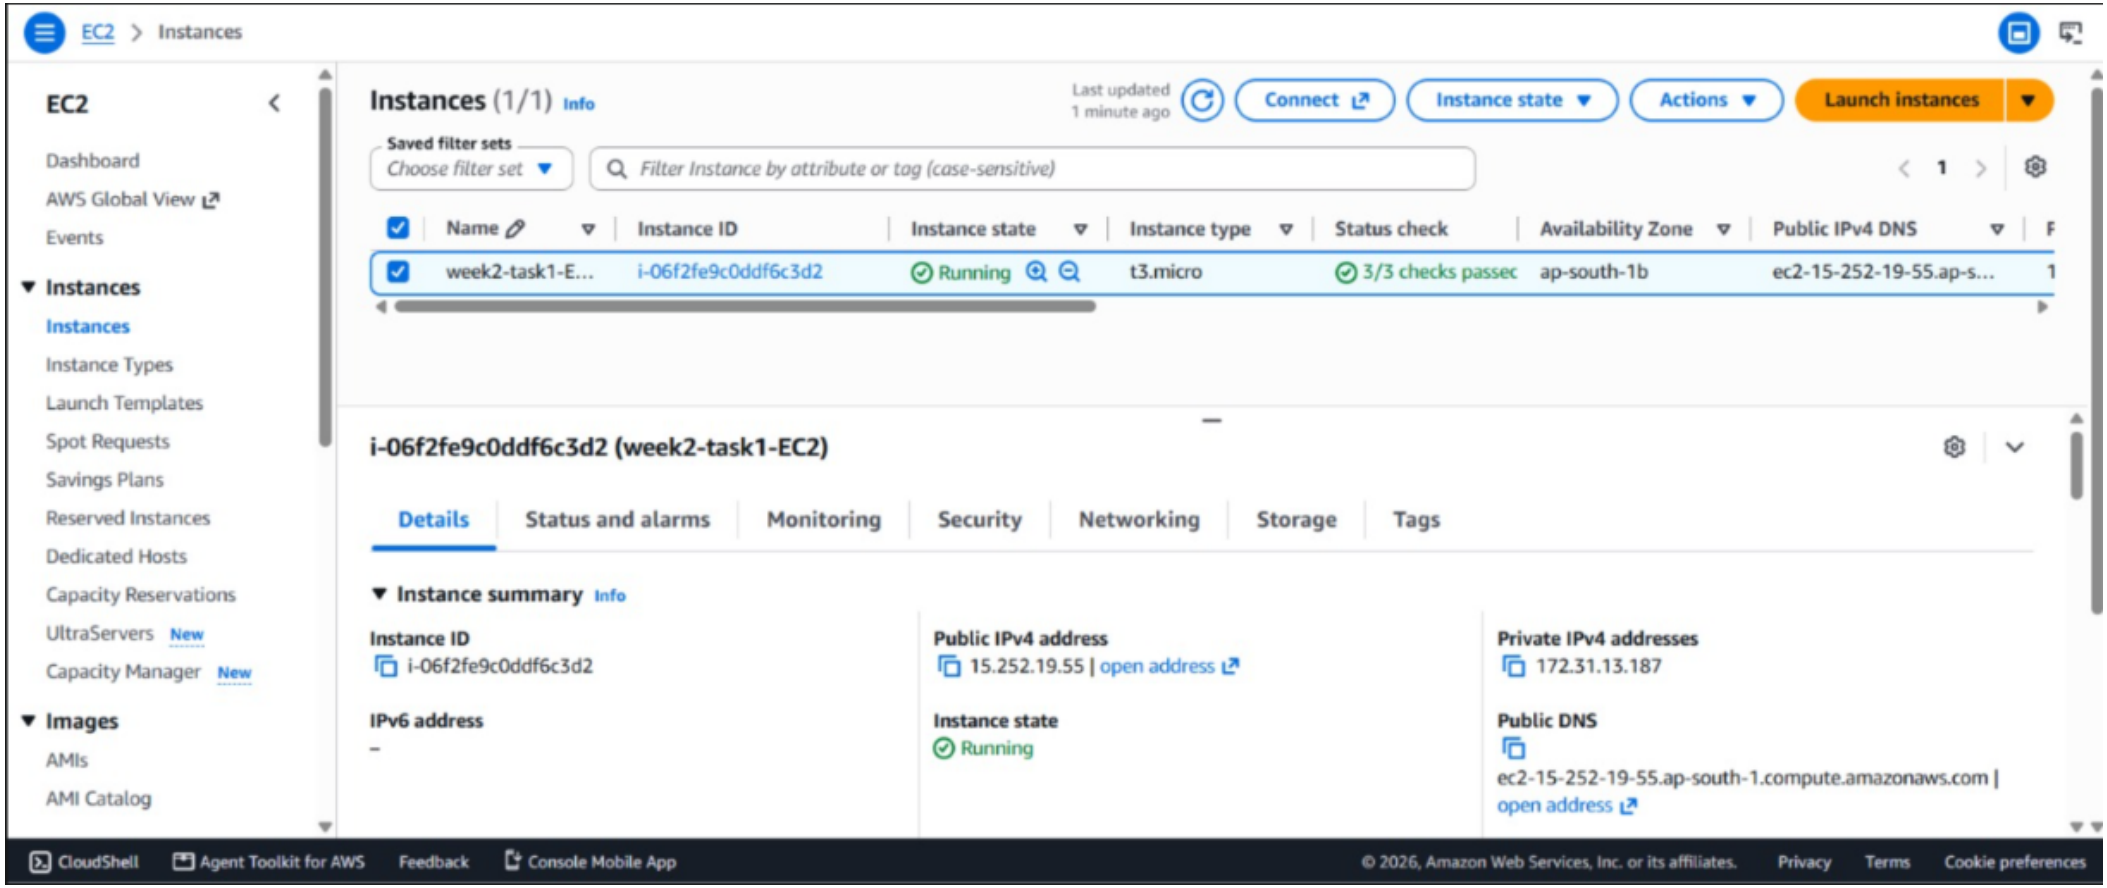

Shows HTTP (TCP 80) configured with Anywhere (0.0.0.0/0) as the source.

Evidence screenshot: 04_Security_Group_HTTP.png

5. EC2 instance running

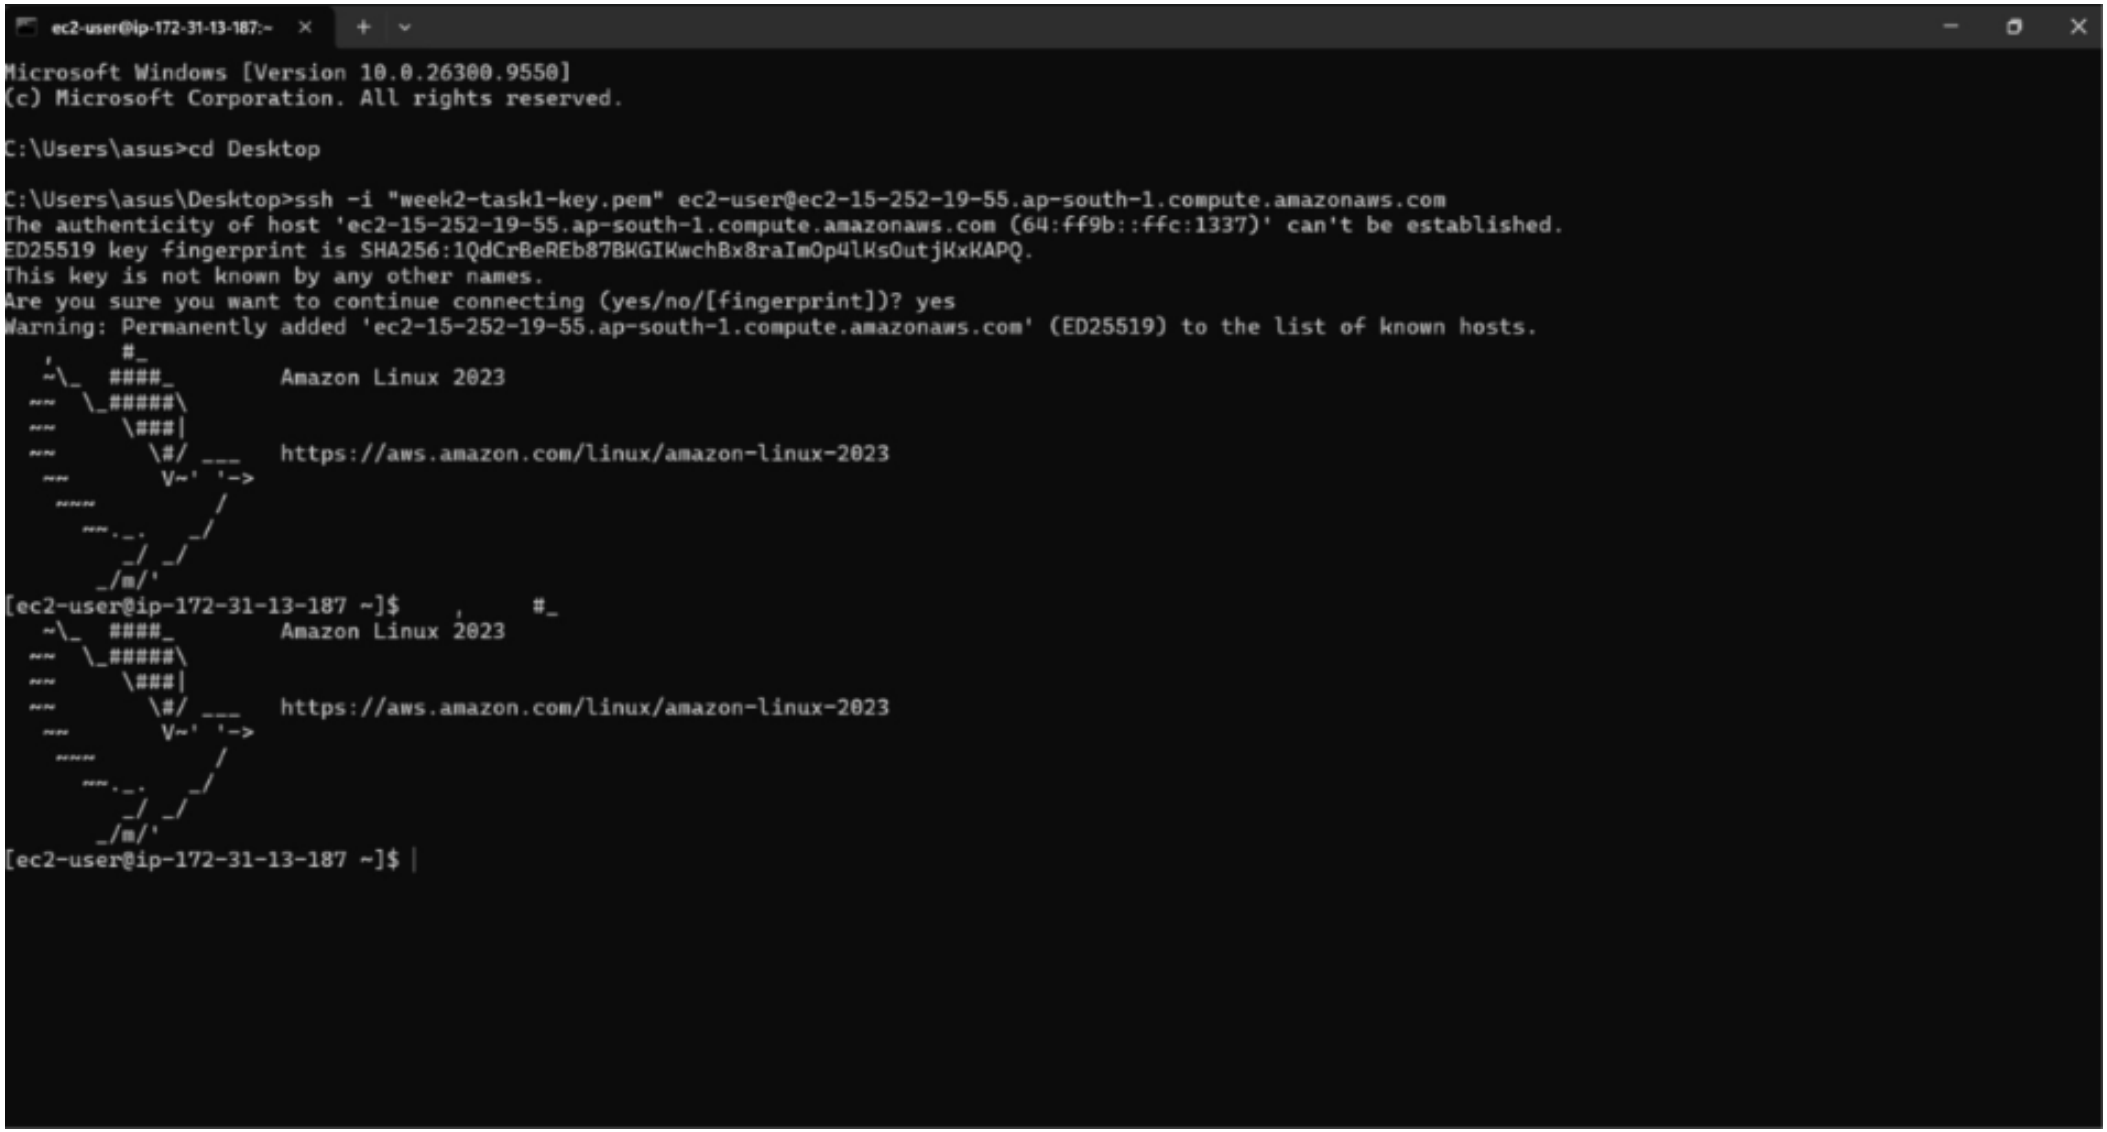

Shows the Week2-Task1-EC2 instance in the Running state, with t3.micro and the public IPv4 address visible.

Evidence screenshot: 05_EC2_Instance_Running.png

6. SSH connection successful

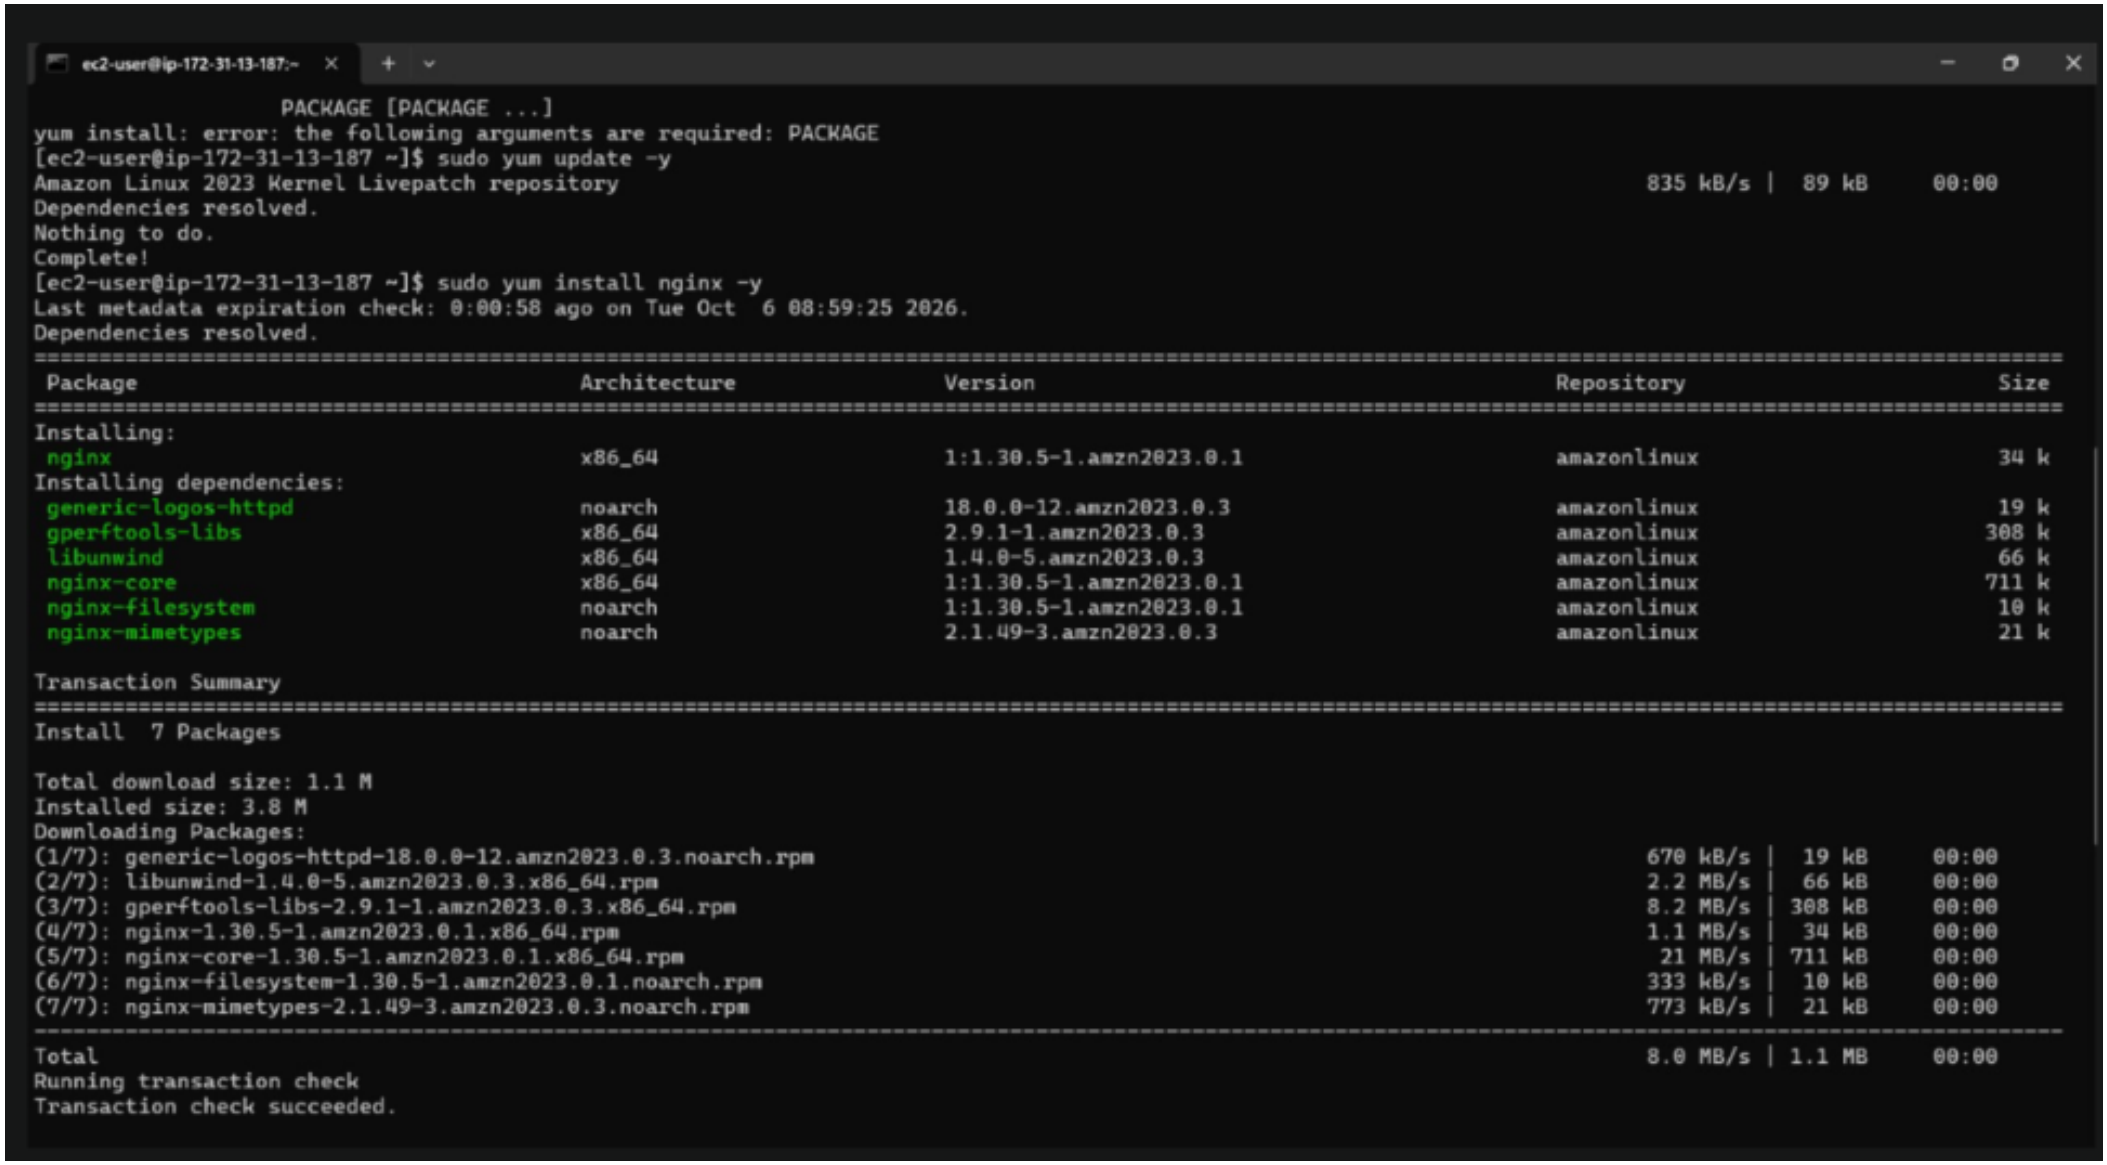

Shows successful SSH login to Amazon Linux 2023 using the week2-task1-key.pem key.

Evidence screenshot: 06_SSH_Connection.png

7. Nginx installation

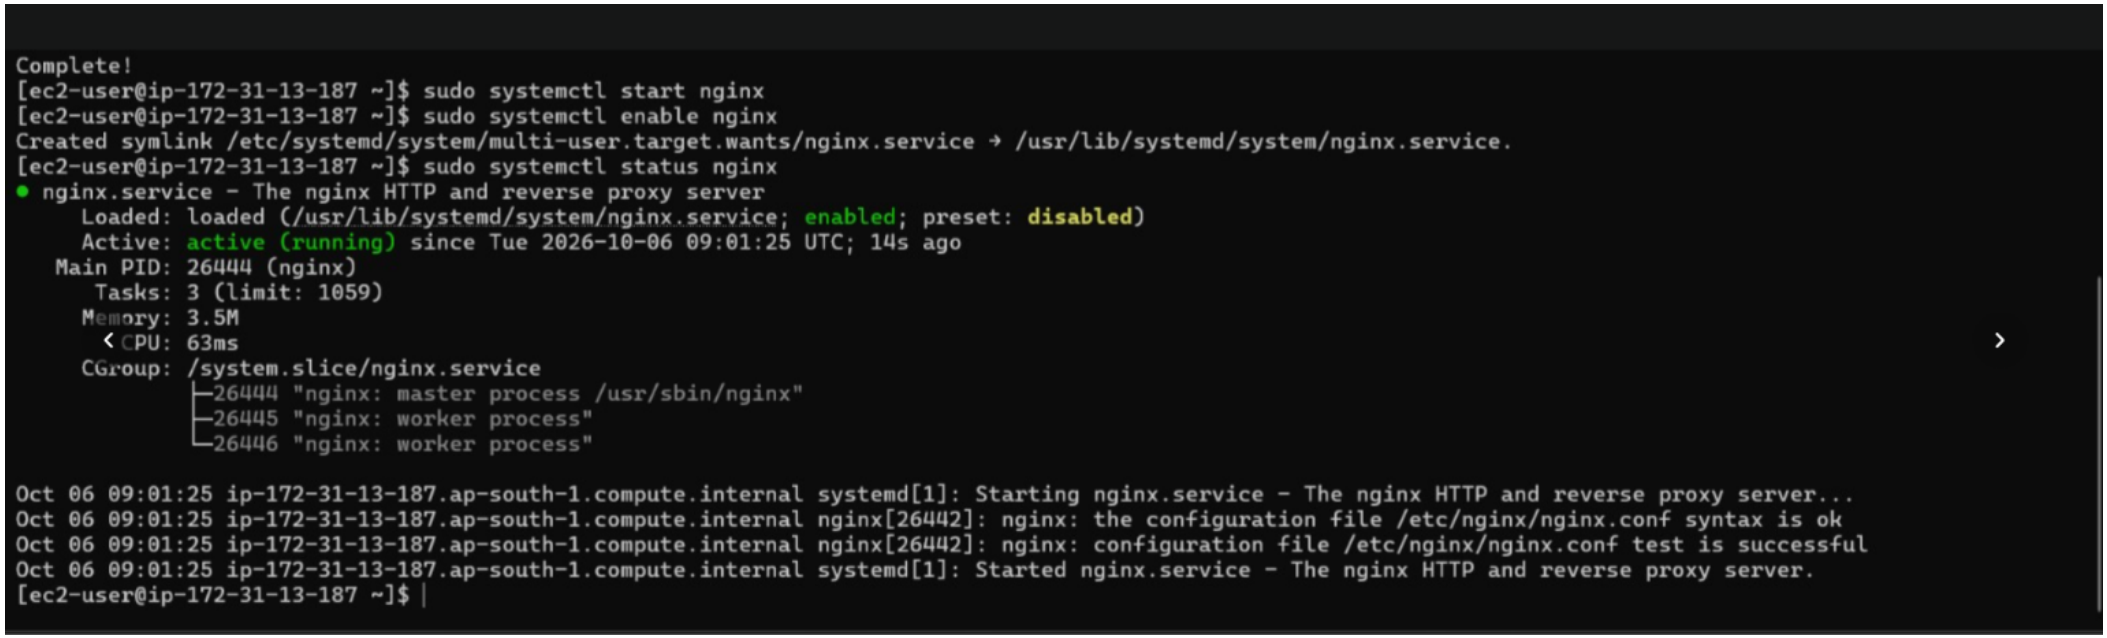

Shows the Nginx package installation completing successfully on the EC2 instance.

Evidence screenshot: 07_Nginx_Installation.png

8. Nginx service running

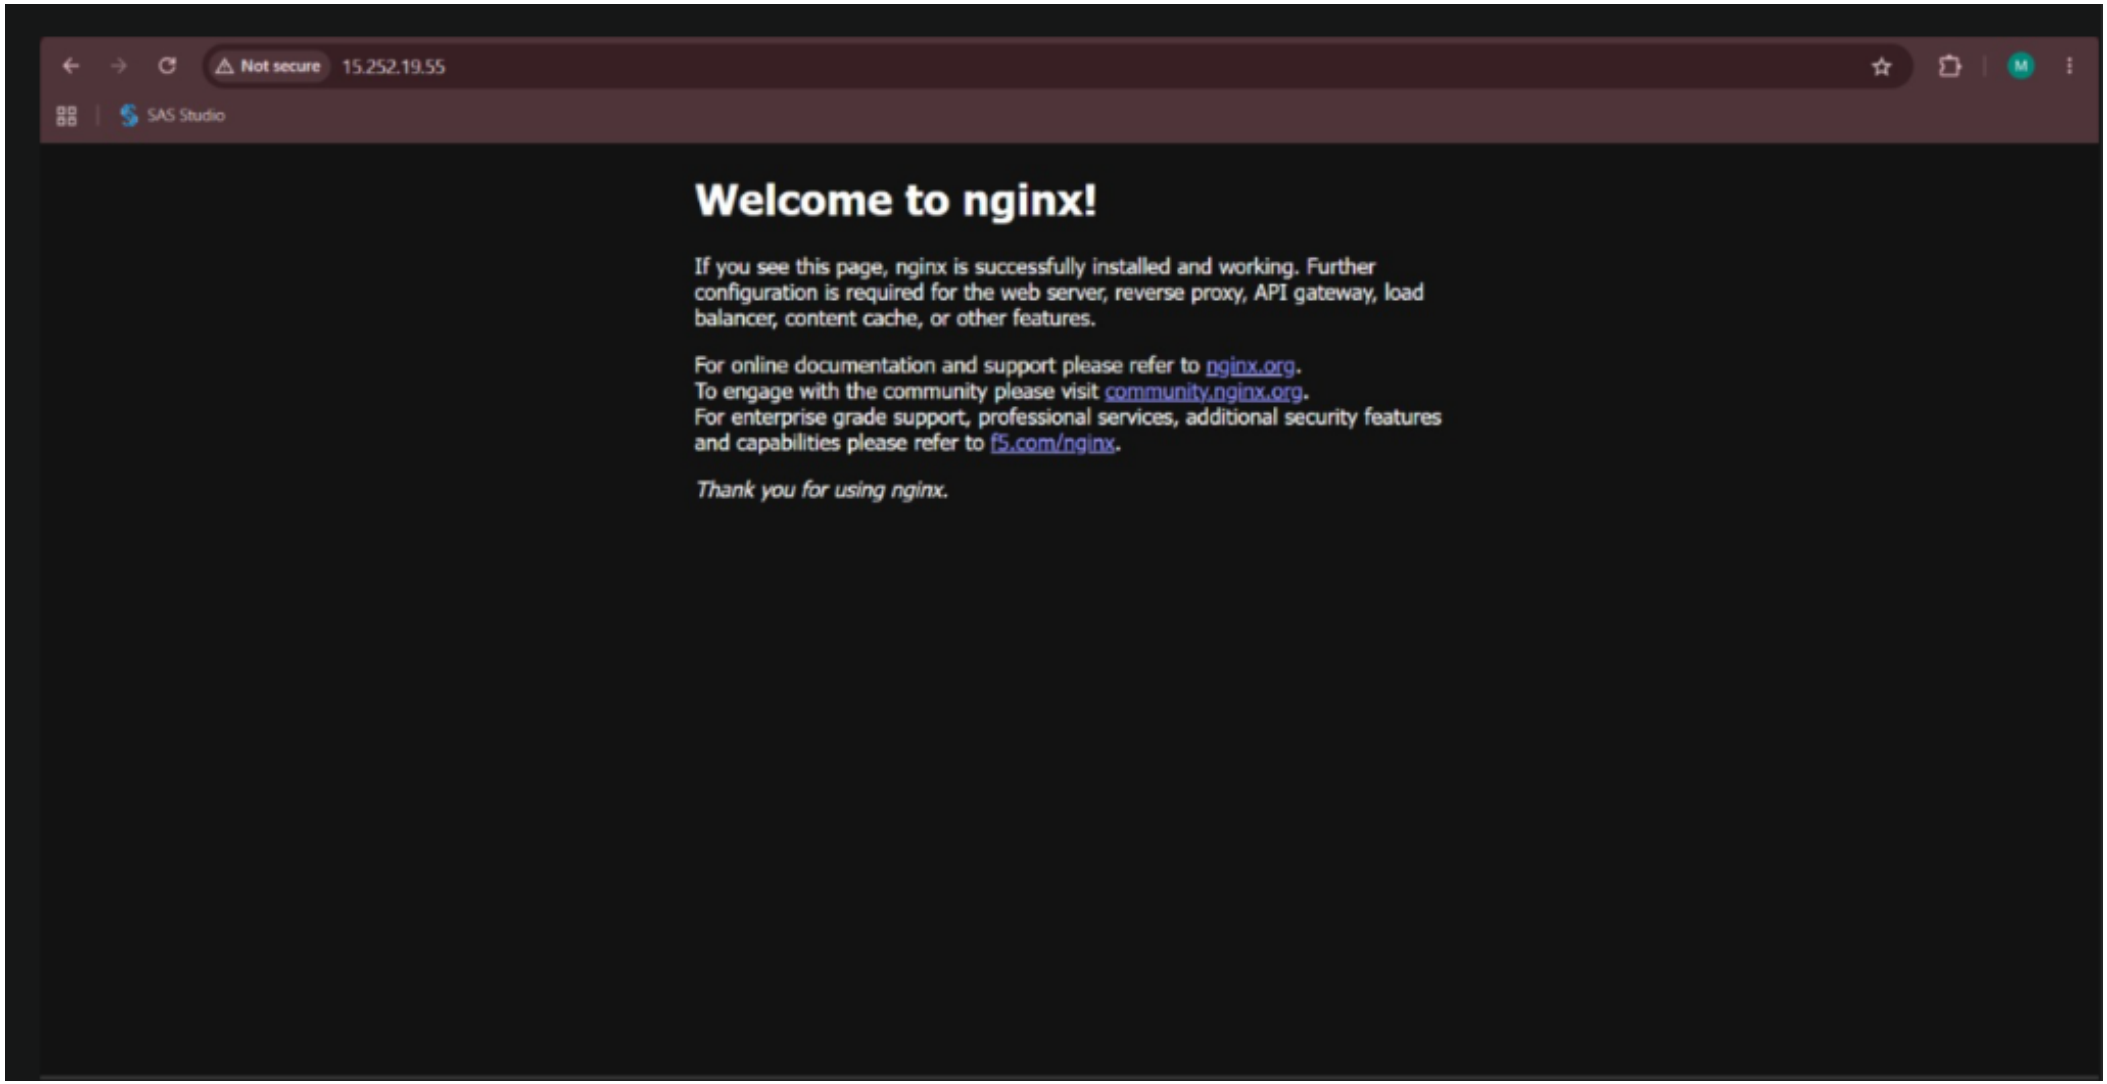

Shows nginx.service as active (running) and enabled.

Evidence screenshot: 08_Nginx_Service_Running.png

9. Nginx accessible via public IP

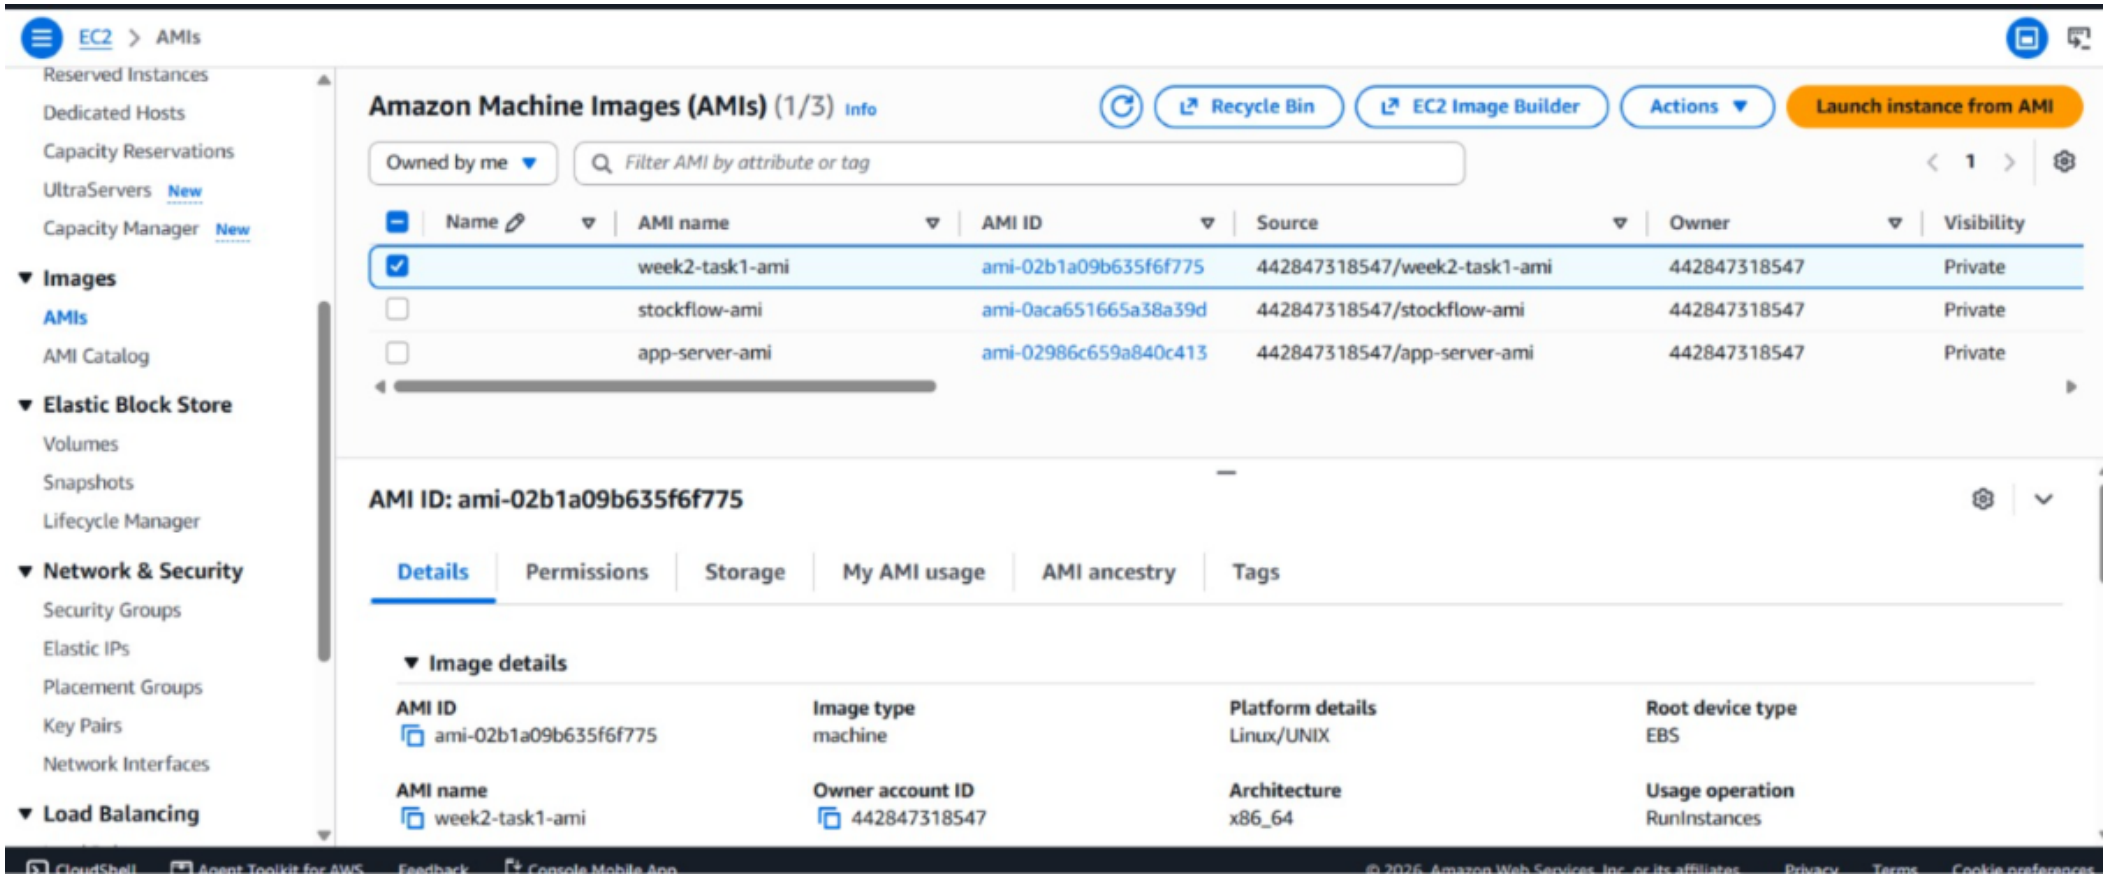

Shows the Nginx welcome page opened through the EC2 public IP.

Evidence screenshot: 09_Nginx_Web_Page.png

10. AMI created

Shows the week2-task1-ami Amazon Machine Image in the EC2 AMIs console.

Evidence screenshot: 10_AMI_Created.png

Task 1 Completion

Task 1 — AWS Cloud Setup has been completed. The evidence demonstrates EC2 launch and configuration, security-group configuration, SSH connectivity, Nginx installation and operation, public web access, and AMI creation.
